SYSTEMIC CRISIS

The Challenge

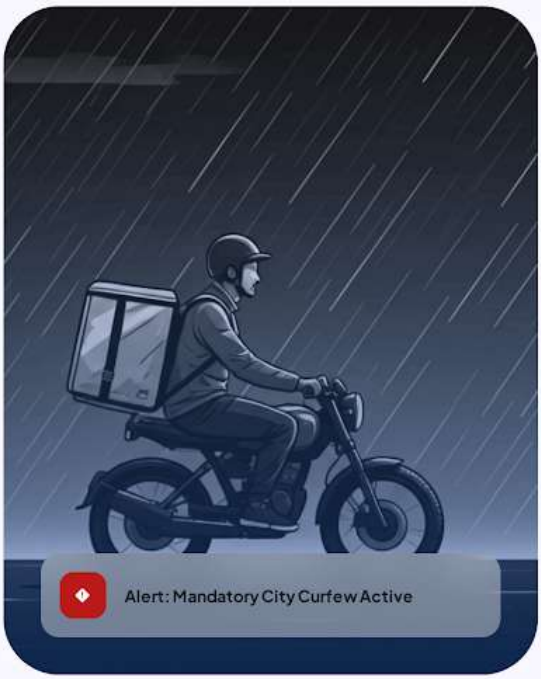
In an industry built on precision, the elements are the one variable delivery riders can't control—and they are paying the price.

INCOME VOLATILITY

Riders lose 20–30%

of their monthly income during disruptions caused by climate and civic events.

ESTIMATED REVENUE IMPACT SEGMENT



Drivers of Instability

The four pillars of operational disruption that ShiftSure addresses through predictive resilience.

Rain

Safety hazards and vehicle degradation lead to 40% slower delivery times and increased risk of accidents.

Extreme Heat

Fatigue and health risks during heatwaves force reduced hours, directly slashing peak-time earnings.

Pollution (AQI)

High AQI levels lead to long-term respiratory issues, forcing uncompensated sick leave for vulnerable riders.

City Curfews

Unforeseen political or social unrest causes sudden lockdowns, instantly vaporizing a day's income.

The industry isn't changing. Your resilience must.

ShiftSure provides the first financial and operational safety net designed specifically for the kinetic workforce. We don't just predict the challenge; we insure against it.
